

### Flowering Trees and Shrubs for Bouquets

The shrubs and trees that form the backbone of your landscape can also be the ones from which you cut the foliage you need for bouquets. This makes limited growing space more productive, and the plants must be pruned anyway. Most of the choices listed here have flowers, but others have attractive or fragrant foliage, or colorful berries. Those marked with asterisks are grown mainly for foliage. N, C, and S refer to recommendations for Northern, Central, and Southern Florida.

- »»» Allamanda (*Allamanda* spp.) CS
- »»» Azaleas (*Rhododendron* hybrids) NCS
- »»» Bauhinia, red (*Bauhinia*) CS
